

March 3, 2011

Ladies and gentlemen:

Hetran is pleased to announce that our local sales and marketing representative, Jagon International Co., Ltd. (HK) has successfully secured the 4th BT-16 *Z-Generation* Bar Turning (Peeling) Machine in China.

Although the international competition was tireless in their technical presentations, Mr. Jack Ju – President of Jagon explained the merits of acquiring Hetran’s “Z” *Generation* equipment; the most advanced technology and state-of-the-art design in bar processing machine available today worldwide.

The primary products manufactured by this Chinese customer, located in Henan Province, are drill collars, integral heavy wall drill pipes and stabilizers for the oil and gas industry.

In addition to these BT-16Z machines for China, Hetran has installed a BT-8Z in Belarus last year. Hetran is scheduled to deliver the world’s largest peeling machine, BT-26Z (650 mm) to India by the end of this year.

We hope the above sales information will be of use to your sales and market campaign in promoting Hetran’s precision machines in your respective countries.

Wishing each and every one of you a Prosperous 2011!
